

DAREDEVIL DIGITAL

BRAND & DIGITAL DESIGN SYSTEM

INTERNAL EDITION 2026

BRAND FOUNDATION

Daredevil Digital is an agency engineered for real growth. We do not recycle playbooks designed for large overseas markets. We optimize around outcomes. Our brand must reflect this focused, premium, and data-driven approach.

PRINCIPLE 01

Clarity Over Clutter

Digital noise kills conversions. We use negative space aggressively to ensure that the core message and the primary call-to-action are never obscured.

PRINCIPLE 02

High Contrast

Our visual language relies on stark contrasts. Deep navy backgrounds against pure white text with vibrant yellow accents to guide the user's eye exactly where it needs to go.

PRINCIPLE 03

Data-Driven Visuals

We use technical diagrams, monospaced data labels, and performance indicators (green dots, percentages) to reinforce our technical authority and CAPI expertise.

PRINCIPLE 04

Premium Simplicity

We avoid childish illustrations and generic stock photos. We rely on pristine typography, subtle gradients, and high-quality photography to project a boutique, high-end feel.

LOGO SYSTEM

LOGO APPLICATION

Our logo is our most recognizable asset. Do not distort, re-color, or crowd it. Always ensure adequate clear space equivalent to the height of the 'D' icon on all sides.

LIGHT BACKGROUND

DARK BACKGROUND

ACCENT BACKGROUND

PHOTOGRAPHIC BACKGROUND

TYPOGRAPHY

Space Grotesk

PRIMARY DISPLAY

Used exclusively for H1, H2, and large display numbers. Imparts a technical yet bold and modern feel.

AA

ABCDEFGHIJKLMNOPQRSTUVWXYZ

ABCDEFGHIJKLMNOPQRSTUVWXYZ

0123456789

H1 / 48-56px / Bold

Bold Digital Strategy.

H2 / 36-44px / Bold

Built For Real Growth.

Inter

BODY / UI

Highly legible sans-serif for long-form reading, paragraphs, button labels, and general UI text. Used in regular (400) and bold (700) weights.

JetBrains Mono

TECHNICAL / LABELS

Used for eyebrows, metrics, data visualizations, and technical specifications. Gives the brand its signature "marketing engineering" aesthetic.

LABEL / 10-12px / Uppercase / Tracking 0.2em

OVERWHELMING

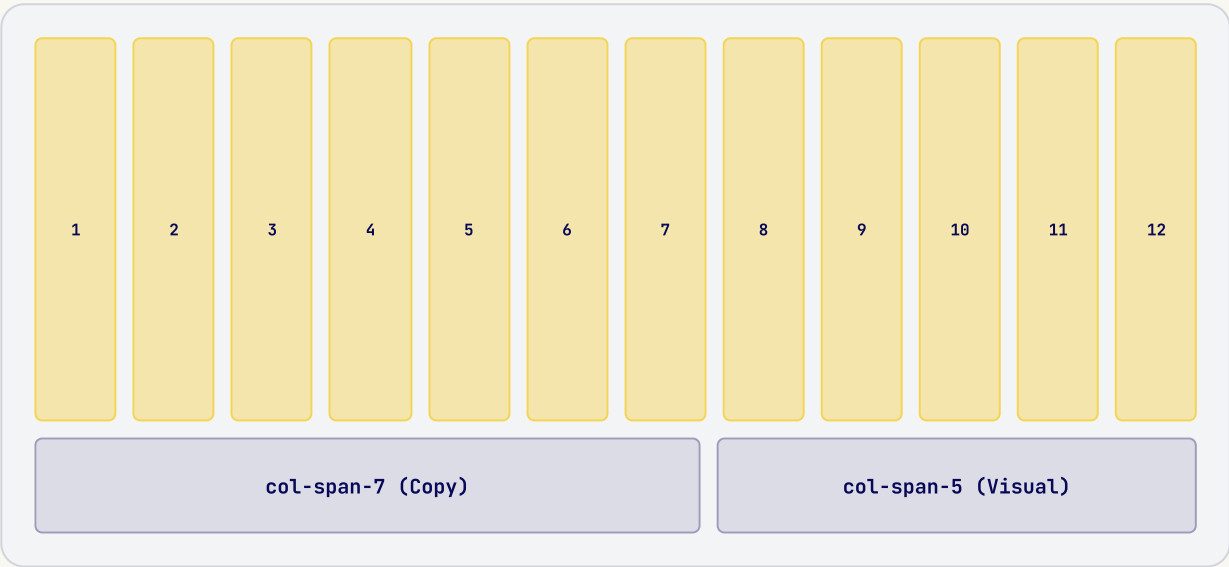

GRID & SPACING SYSTEM

SPACING SCALE

We use a strict 4pt/8pt spacing system derived from Tailwind CSS defaults. Spacing should feel generous and deliberate.

Token	Value
space-1	4px
space-2	8px
space-4	16px
space-6	24px
space-8	32px
space-12	48px
space-16	64px
space-24	96px
py-24 (section)	96px
py-32 (hero)	128px

12-COLUMN GRID SYSTEM (MAX-W-7XL)

TECHNICAL / DATA LANGUAGE

CAPI ENGINE STATUS

D3_INTELLIGENCE_LOOP

OFFLINE MATCHES

1,842 +18.4%

MATCH QUALITY

9.4/10

Technical data blocks should use JetBrains Mono for numbers/labels, and stark contrasts (green/yellow on charcoal) to mimic performance analytics dashboards.

MOTION SYSTEM

Animation is used to guide attention, confirm interactions, and reveal content gracefully as the user scrolls. We rely on Framer Motion for precise, physics-based UI animation.

Scroll Entrance (Fade Up)

Standard entrance for text sections and cards when scrolling into view.

```
initial={{ opacity: 0, y: 30 }}
whileInView={{ opacity: 1, y: 0 }}
viewport={{ once: true, amount: 0.2 }}
transition={{ duration: 0.6 }}
```

Interactive Hover (Cards)

Used for portfolio items or image grids to indicate clickability.

```
whileHover="active"
whileTap="active"

variants={{
  active: { scale: 1.05 }
}}
transition={{ duration: 0.7 }}
```

Micro-Interactions

Fast, responsive feedback for buttons and links. Usually handled via Tailwind CSS classes.

```
className="
  transition-all
  duration-300
  hover:bg-brand-yellow
"
```

DEVELOPER TOKENS

Tailwind Variables (index.css)

```
@theme {  
  --color-brand-navy: #080857;  
  --color-brand-burgundy: #6F2420;  
  --color-brand-yellow: #F5C400;  
  --color-brand-offwhite: #F8F7F2;  
  --color-brand-charcoal: #161616;  
  --color-brand-purewhite: #FFFFFF;  
  
  --font-display: "Space Grotesk", sans-serif;  
  --font-body: "Inter", sans-serif;  
  --font-mono: "JetBrains Mono", monospace;  
}
```

JSON Tokens Location

A complete programmatic JSON representation of this design system is available in the root repository under:

Daredevil_Digital_Design_Tokens.json

Class Application Standards

Headings: Always apply `font-display`

Primary Action: Always use `bg-brand-yellow text-brand-navy`

Page Background (Light): `bg-brand-offwhite` or `bg-brand-purewhite`

Page Background (Dark): `bg-brand-navy`
